

Plastic Surface Cleaner

With the cleaning path being 28 - 38 cm/12-15inch (according to the different model selected), compared to the cleaning width of about 5 cm of the standard nozzle, it can greatly improve the cleaning efficiency for cleaning a large area. When in use, the high-pressure water jetting and the rotating motion will produce a steady uplift force for easy maneuver. The fixed cleaning height can ensure a uniform cleaning effect. When cleaning, the cover plate can prevent splashing out to ensure the safety of the operator. Suitable for large area cleaning operations such as driveways, walkways, courtyards, streets, parking lots, etc.

PLFC-K15

K15 Plastic 15-inch Surface Cleaner

Best for large area cleaning with efficiency more than 4-5 times that of standard tip nozzles

It includes a 15" plastic cover, an aluminum or brass bearing housing, and a round-shaped spray rod with the precise nozzle angle and enables smooth rotation. It has stainless steel bearings and a ceramic seat.

Max Temp.: 60°C/140°F

Max Pressure: 3300psi/227bar

Inlet Fitting: 1/4" QD plug

Nozzle Orifice: 2 x 2.0

CODE	PLFC-K15
Max Pressure	3300psi/227bar
Max Temp.	60°C/140°F
Inlet Fitting	1/4" QD Plug
Nozzle Orifice	2 x 1.5
